ProjectXnet
Managed Hosting for the AEC Industry

KELAR PACIFIC
Certified Partner

Solutions Overview

ProjectXnet delivers enterprise level applications over the internet including industry proven end to end support. Our hosting solutions enable you to streamline the management of information in a structured, web based environment. We specialize in working with Corporations and Construction Industry participants to maximize collaborative efforts and the lifecycle of legacy, new, and forthcoming technologies. The end result is less headaches, lower costs and satisfied users.

Project Management

Web enable your project teams to work from anywhere, anytime. We have years of experience with product lines from leading vendors such as Meridian Systems, Primavera Systems, Viewpoint and more.

Office Management

Our Office Suite bundle combines the full capabilities of Microsoft Office Professional and Document Locator enabling the entire team to capture, manage and share email, paper and digital documents via workflows in one repository.

Scheduling

Enhance existing scheduling processes with a centralized online solution. Use the Primavera or Microsoft Project product line to produce enterprise cost and resource loaded CPM schedules.

Finance & Accounting

Leverage the internet for access to Timberline, Masterbuilder, Quickbooks or other popular accounting packages. We also support several industry proven integration products to enable seamless flow with other applications.

Enterprise Email

Use Microsoft Exchange 2007 to collaborate with team members through integrated email. Share calendars, tasks, and other items in real time from the desktop or mobile device. Enjoy the simplicity of fully managed enterprise email.

Mobile Devices

Stay mobile by integrating the latest handheld and tablet PC devices.
